

Ned CURIC
Chief Engineering and
Technology Officer

Ned Curic was appointed Chief Technology Officer and a member of Stellantis' Top Executive Team on August 30, 2021. As of July 2023, his scope of responsibility was expanded to include research and development activities and he was named Chief Engineering and Technology Officer.

From June 2017, Ned Curic was Vice President, Alexa Automotive at Amazon spearheading Amazon's efforts in the Automotive industry.

Ned Curic started his career in 1996 in the field of Engineering Systems at Northrop Grumman, an American multinational aerospace and defense technology company.

After a short stint in the financial industry, in 2000 he joined Microsoft where he held various roles in Consulting, Product, Security and Advisory.

He entered the automotive sector in 2013, as Group Vice President & Chief Technology Officer at Toyota Motor North America and, in 2015, became Co-founder and Executive Vice-President, Technical Director and Board Member at Toyota Connected.

Ned Curic studied Informatics and Computer Science, and received a Master's in Business Administration (Pepperdine University, George L. Graziadio School of Business and Management) in 2012.
